

Akshata Ramgeer

Hyderabad, India | +91 7378845357 | akshataramgeer@gmail.com

SUMMARY

Application security professional with hands-on knowledge of OWASP Mobile Top 10, Android APK analysis, and mobile vulnerability assessment. Proficient in Burp Suite, Wireshark, Nmap, apktool, and jadx. Experienced in static and dynamic analysis for identifying and remediating mobile and web application vulnerabilities.

TECHNICAL SKILLS

Mobile Security: OWASP Mobile Top 10, Android App Security, APK Static/Dynamic Analysis, apktool, jadx

Security Tools: Burp Suite, Wireshark, Nmap, OWASP ZAP

Application Security: OWASP Web Top 10, Vulnerability Assessment, Penetration Testing, CVSS Scoring, Secure Coding, Threat Modeling

Networking & OS: Networking Security, Linux Fundamentals, Cryptography Basics

Programming: Python (Basic), Java (Basic)

EXPERIENCE

Technical Recruiter Trainee | Software Guidance and Assistance, Pune | Nov 2022 – Jun 2023

- Screened technical security profiles, developing understanding of AppSec skill requirements and industry tooling
- Coordinated hiring for cybersecurity roles and improved candidate pipeline by 30% through targeted technical assessments

PROJECTS

Vulnerability Management System (Web and Network Security)

- Designed and built a full vulnerability management pipeline to discover, classify, and prioritize security weaknesses across web applications and network infrastructure
- Implemented CVSS-based severity scoring to triage vulnerabilities by risk level and assigned remediation timelines accordingly
- Generated structured remediation reports with detailed findings, affected components, and recommended fixes for each identified issue

Smart Door Lock System – Secure Access Control (C)

- Developed a digital key-based authentication system in C enforcing strict access control, allowing only authorized users to unlock the system
- Applied secure coding principles including input validation, session handling, and fail-safe defaults to prevent unauthorized access
- Simulated real-world access control scenarios to test system resilience against brute-force and replay attack patterns

EDUCATION

B.E. in Computer Engineering | ISBM College of Technology, Pune | 2020 – 2023

Diploma in Computer Engineering | Marathwada Mitra Mandal's Polytechnic, Pune | 2017 – 2020

CERTIFICATIONS AND TRAINING

- Cybersecurity Training — Krutantic Solutions (threat analysis, vulnerability concepts, secure system practices)
- Self-study: OWASP Mobile Security Testing Guide (MSTG), TryHackMe, PortSwigger Web Academy
